... ..

1. The first group of people who are interested in the study of the history of the world are the historians. They are people who study the past and write about it. They are interested in the events that have shaped the world and the people who have lived through them. They are also interested in the changes that have taken place over time and the reasons for these changes. They are people who are curious about the world and want to know more about it.

REMARK,

1. The first part of the paper is devoted to a review of the literature on the topic of the role of the state in the development of the economy. It is found that the state has played a significant role in the development of the economy in many countries, particularly in the case of developing countries. The state has been able to mobilize resources, provide infrastructure, and create a favorable environment for investment and growth.

[illegible]

• **Figure 1** shows the results of the regression analysis. The dependent variable is the number of days of absence from work due to illness. The independent variables are the age, sex, and education of the respondent, the number of children in the household, the number of hours worked per week, and the number of years since the respondent last completed a course of education. The results show that the number of days of absence from work due to illness increases with age, sex, and education. The number of children in the household, the number of hours worked per week, and the number of years since the respondent last completed a course of education are not significant.
